

## MEET YOUR DOCTOR

*Dilantha B. Ellegala, M.D.*

At SonoSpine®, we offer minimally invasive back and neck surgery using advanced ultrasonic technology. Dr. Dilan Ellegala, our Founder and Surgeon-In-Chief has combined innovative microneurosurgical techniques with cutting edge, patented, and FDA approved ultrasonic technology which allows for millimeter by millimeter decompression of the spinal cord or nerve roots. He has completed hundreds of cases with unmatched results. Bottom line, SonoSpine offers patients a significantly better spinal surgery solution without spinal destabilization as with traditional procedures.

# THE SONOSPINE® DIFFERENCE

An Incision Smaller Than  
the Size of a Bandage

SHORTER  
RECOVERY  
TIME

FASTER PAIN  
RESOLUTION

FEWER  
COMPLICATIONS

TOTAL  
SURGEON  
CONTROL

BEYOND  
MINIMALLY  
INVASIVE

Traditional spinal surgery can require periods of up to 5-6 months. SonoSpine® patients typically recover in 1 month or less with most of our patients returning to light activities within days of the procedure.

## SAY GOODBYE TO PAINFUL SPINAL FUSION

Sonospine® eliminates  
debilitating fusion for  
most patients.

# CONDITIONS WE TREAT

BULGING OR HERNIATED DISCS

DEGENERATIVE DISC DISEASE

BONE SPURS

SPINAL STENOSIS

FAILED BACK SURGERY SYNDROME

PINCHED NERVES

- ✓ Neck pain that may include pain in the arms or hands.
- ✓ Back or neck pain that may or may not include radiating pain in the leg or arm.
- ✓ Painful burning, tingling, or numbing sensation down the legs or arms.
- ✓ Back pain that may include pain in the hips, legs, and/or buttocks.

## GET BACK TO FULL ACTIVITY QUICKLY AND RETAIN YOUR MOBILITY!

"As a marathoner, I couldn't imagine being away from running... [After my surgery] The pain hasn't returned. Just three weeks after surgery, I was walking two miles three times a day. I have full mobility in my neck and don't fear the effects of hardware on my spine long term, because there isn't any! SonoSpine® gave me my life back."
